BUSINESS SOLUTIONS

PARTNERS FOR YOUR

BUSINESS' SUCCESS

Our vision at Reddell Business Solutions is always to make information technology services available to enhance business profitability for organizations and individuals to help the way they think, work, learn, communicate, and operate.

To innovatively humanize technological services by building relationships with those we serve. To always strive for excellence, and as an organization, to stress the need for personalization and warmth in all our dealings.

Reddell Business Solutions will continue to contribute to the world of information technology by creating tools and providing expertise for organizations to advance their business and facilitate their enterprise in the pursuit of the greater good.

vCIO

RBS provides vCIO solutions that make using your IT easier than ever. Our IT consulting service takes the complexity out of using technology for a simplified business.

For some businesses, hiring a full-time executive IT role isn't always possible. At Reddell Business Solutions, our vCIO service provides your business with experienced professionals.

The cost of employing a dedicated CIO in a smaller business can be prohibitive and difficult to justify, but it shouldn't stop you from seeking the strategic insight you need to strengthen your business technology posture. Find out how vCIO can help your business become more competitive, compliant, and profitable.

Take advantage of the IT consulting services of a vCIO and realize significant cost savings by avoiding the salary, perks, and bonuses involved in recruiting and retaining a full time, in-house CIO.

MANAGED SERVICES

From research and budgeting to server updates and Office 365/Google Apps management, RBS can put you miles ahead of your competition. Here are some of the top services our clients take advantage of:

- Backup and Disaster Recovery
- Proactive Monitoring and Maintenance
- Remote Help Desk
- Dedicated Managed Hosting
- Remote Support (Including Mobile Devices)
- Onsite/Offsite Data Storage Solutions
- Microsoft Windows, Server, Exchange, and SharePoint Management
- Installing/Maintaining Network Security (Anti-Virus, Anti-Malware)
- Firewall Management
- Network Maintenance
- Desktop Inventory and Management
- Server Administration

RBS Managed Services delivers your organization a complete IT department. Say goodbye to your technical worries. We take full responsibility for your IT – supporting, resolving, liaising with third suppliers, and keeping you informed every step of the way, letting you concentrate on doing what you do best.

There are no hidden costs or financial surprises! RBS Managed Services is billed on a straightforward, all-inclusive monthly basis, enabling you to plan ahead.

The team starts by performing a comprehensive review of your IT infrastructure, software, and systems to understand your current environment. Post review we will begin fixing the high-priority issues and work towards improving the efficiency of your IT systems. Based on the service level agreement, we will perform ongoing/periodic monitoring and maintenance of your workstations, servers, and IT equipment.

BUSINESS SOLUTIONS

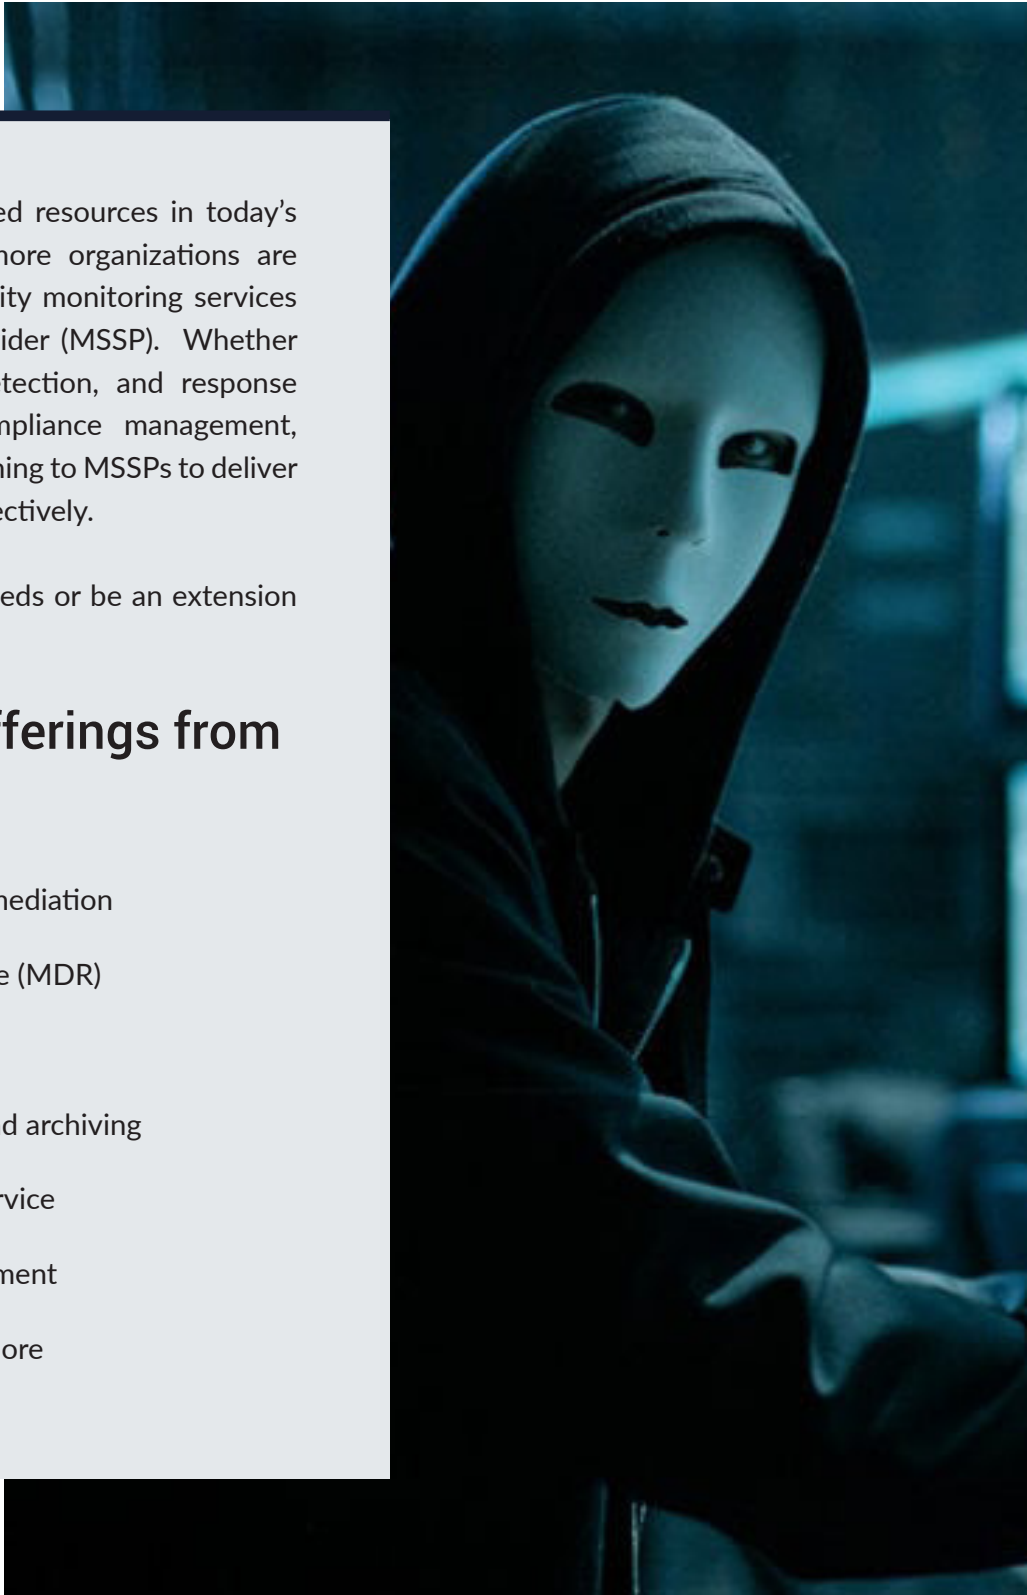

MSS – MANAGED SECURITY SERVICES

With a significant shortage of skilled resources in today's cybersecurity market, more and more organizations are opting to outsource essential security monitoring services to a managed security service provider (MSSP). Whether for log management, managed detection, and response (MDR), SIEM-as-a-service, or compliance management, organizations large and small are turning to MSSPs to deliver these solutions quickly and cost-effectively.

Let us handle your cybersecurity needs or be an extension to your IT team.

Managed security offerings from RBS can include:

- Vulnerability assessment and remediation
- Managed detection and response (MDR)
- Threat and malware detection
- Log management, monitoring, and archiving
- Managed SIEM or SIEM-as-a-Service
- Continuous compliance management
- Cloud security monitoring and more

CLOUD SOLUTIONS

Cloud strategy that drives transformation

We design, develop, and deliver transformational cloud solutions to drive businesses forward.

We aim to provide your organization with the tools to innovate and transform your business.

Through a series of discovery sessions, our team of cloud specialists will work closely with you to get an in-depth understanding of your business and your objectives. From there, we'll develop a tailored cloud strategy for your organization.

We can help you:

Transform the way your business works via cloud-based productivity and collaboration software solutions and cloud-optimized devices.

Modernize your IT infrastructure with high-performance, cost-saving, and serverless cloud solutions.

Innovate with data, harnessing the power of real-time analytics, machine learning, and, artificial intelligence.

VOICE / DATA SOLUTIONS

A smooth, painless transition that will streamline your business.

If you're still using old technology, you're missing out. With secure, reliable, cloud-based systems, you get instant access to all your companies' services. Whether you're in the office, with a client or at the beach (We will keep it confidential).

With none of the traditional hardware costs or equipment, you get access to a rich and diverse set of features at a great value. Set up is easy, and you can quickly scale up or down as your needs change.

We handle every step of the implementation so you can stay focused on your business. If you have questions or need support, your account manager will handle it and get you back on track, eliminating costly delays.

Cloud-based telephone services will revolutionize the way your company works and engages clients. Doing business is just more accessible - and more enjoyable - when you're streamlined in the cloud.

TELECOM BILLING AUDIT

Telecommunications bills are one of the most complicated bills in the world. The sheer number of products and services cause inevitable errors. RBS will audit your bills to ensure that you're ordering what you need and paying what you expect.

BUSINESS PHONE SYSTEMS

Cloud-based telephony allows you to integrate your smartphones and tablets, turning daily devices into quality business tools. We offer a wide selection of hardware and hosted solutions so your data is stored securely and can be accessed through the internet.

TECHNOLOGY THAT TRANSFORMS THE WAY YOU DO BUSINESS

Our partnerships give us the freedom to choose from an extensive range of solutions that offer world-class technology, deployed in a cloud-based environment. We'll assess the communication needs of your business, then design and deliver a solution that's right for you. Provide ongoing maintenance, upgrades, and support to give you peace of mind.

HOSTED PBX

Our hosted PBX solutions help you move your communications into the cloud, with powerful tools and rich features. It's a cost-effective way to build, deploy, and scale enterprise communications systems that keeps everyone connected. We provide far greater functionality and cost control than traditional PBX systems.

UNIFIED COMMUNICATIONS

Unified communications is a flexible, affordable, and real-time communications solution that can be implemented on any network or device. It offers a single, user-friendly, web-based interface for all communication and collaboration tools. It allows everyone to enjoy the same experience no matter where they are or what device they're using.

DATA SOLUTIONS

RBS is your one point of contact for all your data needs. Anywhere in the world, we offer only the best ethernet connectivity, fiber internet, and reliable connections. What is SD-WAN? Software-Defined Wide Area Networking (SD-WAN) is a transformational approach to simplify branch office networking and assure optimal application performance. Unlike traditional WANs, SD-WAN delivers increased network agility and cost reduction. Software-Defined WAN has its roots in Software-Defined Networking (SDN), the underlying principle of which is to abstract the network hardware and transport characteristics from the applications that use the network.

ADVANTAGES OF SD-WAN SOLUTIONS

SD-WAN solutions provide the software abstraction to create a network overlay and decouple network software services from the underlying hardware.

RBS ONE

Imagine having all your information technology expenses on ONE invoice for ONE monthly price.

Monitors, keyboards/mouse, laptops, servers, phones, printers, software licenses, web hosting, internet data, telephones, email, IT support, and much more.

Stop imagining.

Never buy again. Never worry again. Move forward the ONE way.

Ask us how today!
